(A Readymade Garment Manufacturer & Exporter)

**A**raz Garments Limited (**AGL**) is one of the concerns of **ARAZ GROUP OF COMPANIES LIMITED** which is a privately owned company engaged mainly in manufacturing and exporting readymade garments from Bangladesh for more than a decade. AGL's mission is to be a pioneer in manufacturing and supplying quality garments to all its buyers with zero defects.

It has the combination of state-of-the-art manufacturing units of ladies lingerie and skilled operators and professionals for which it can produce quality garments with competitive prices. Since its inception in 1991 with a limited operation, the factory has aggressively expanded and at present the turnover has gone up to more than five million dollar a year. To strengthen its backward linkage, the company is planning to setup a high capacity composite knit and dying factory and spinning mills in near future.

Moreover, AGL analyzes the present global market position and found that there are huge potentials and opportunities to setup 100% export oriented readymade garment manufacturing factories in Bangladesh and hence made an architectural plan to setup a high capacity of international standard factory in the capital of Dhaka.

AGL has well reputed international buyers who are mainly from big retail stores and outlets from two different continents: America and Europe. AGL is steadfast and loyal to all its customers.

AGL plays a critical role in quality control for all its customers. It established quality control as a separate entity from sales and production. It believes that there are two essential elements in quality control: leadership of management and careful inspection of merchandise. The main purpose of such belief in quality control is a long lasting AGL's tradition to offer its buyers first-quality merchandise at all times. For these reasons it is continuously following a measurement based strategy that focuses on process improvement and variation reduction through the application of Six Sigma.

AGL also plays a major role in economic development for the country. It actively recruits and employs skilled employees from the local population at all levels and the total employments are more than a thousand. It strictly follows the local labor law of the country in every steps of its recruitment process.

AGL follows a fair business practice. It is an equal opportunity employment organization.
